Self Intro:

Good morning/afternoon, sir/madam.

My name is Sutheshna A.

I completed my B.Tech in Artificial Intelligence and Data Science from Velalar College of Engineering and Technology, Erode, in 2026. During my academic journey, I developed a strong interest in Artificial Intelligence and Machine Learning. To gain practical exposure, I completed my internship at Lennox India Technology Centre, where I developed an offline LLM-based solution to summarize FEA simulation reports. I also worked on projects such as a CNN-based Plant Disease Detector for early disease identification and COPS in Cars, an AI-powered accident detection and emergency alert system developed using YOLOv5 and Raspberry Pi. These experiences helped me strengthen both my technical and problem-solving skills.

After my graduation, I decided to further enhance my knowledge in the field of Artificial Intelligence and joined the Generative AI course at Testleaf.

My interest in Generative AI started when I learned about Large Language Models and their ability to solve real-world problems through intelligent automation and content generation. This motivated me to build my career in the GenAI domain.

The Testleaf GenAI course has been a valuable learning experience for me. It helped me understand concepts such as prompt engineering, LLMs, AI workflows, and practical GenAI applications. The course also improved my analytical thinking, problem-solving abilities, and confidence in working with modern AI technologies.

Coming to my family, we are a family of four. My father is a businessman, my mother is a homemaker, and I have one sibling.

I am from Namakkal, Tamil Nadu.

My hobbies include riding bikes and playing cricket, and my interests are in Artificial Intelligence, Generative AI, and continuously learning new technologies.

Thank you for giving me this opportunity. I look forward to contributing my skills, learning from experienced professionals, and growing with the organization.
